TURBINE
hotel and cultural center

The **aim** is to produce a design proposal for the upgrading of an industrial heritage building into a multi-functional tourist center that is both socially and historically sensitive.

The **objectives** include, architectural heritage conservation through adaptive reuse, effectively equip the structure with the functional facilities and requirements to support tourism, create contemporary cultural stimulation and educational opportunities, create a strong brand identity to promote the proposed tourist hub.

- Proposed Site Location
- Significant tourist attractions
- Access to public transport
- Significant social attractions
